MAHENDAR KAGITHALA

Platform Support Engineer | ETL & Data Engineering | Informatica Administration

203-952-1565 | Mahendarkagithala@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Platform Support Engineer with 10+ years of experience managing enterprise-scale ETL, data integration, and platform operations across US Banking and Healthcare domains. Proven track record supporting mission-critical production environments with 10,000+ jobs at Truist Bank, driving zero-downtime operations, and building observability frameworks that reduce incident response times. Deep expertise in Informatica PowerCenter/IICS, Netezza, SQL, cloud automation (AWS), and security tooling (CrowdStrike, Splunk, Qualys). ISC2 Certified in Cybersecurity with strong SDLC, audit, and compliance experience.

PROFESSIONAL EXPERIENCE

Platform Support Engineer — Jan 2021 – Present

Truist Bank (formerly BB&T & SunTrust) | US Banking | Enterprise Data Office

Manage production platform for 120 enterprise applications, 2,000+ source objects, and 10,000+ ETL jobs feeding Regulatory Reporting, CCAR, Financial Crime analytics, and Marketing intelligence.

- Led a team of 10 engineers maintaining 10,000+ production ETL jobs for one of the largest U.S. banks, sustaining 99.9%+ uptime for a platform directly impacting stock market credibility and regulatory compliance.
- Designed and deployed an enterprise-wide dashboard framework using Power Automate + Tableau tracking OLA/SLA compliance, job failure metrics, Informatica long-running jobs, Netezza table growth, and data validation KPIs — eliminating manual reporting and providing real-time management visibility.
- Automated HealthCheck reports from fully manual processes to script-based delivery, reducing reporting effort by an estimated 80% and enabling proactive issue detection.
- Executed Disaster Recovery (DR) strategies for Informatica PowerCenter and IICS, ensuring high availability and minimizing downtime for critical bank data pipelines.
- Improved Informatica PowerCenter load-balancing performance by transitioning from Round Robin to Adaptive mode, optimizing resource utilization across high-volume ETL workloads.
- Led Informatica PowerCenter-to-IICS migration as part of the Truist Bank merger integration, coordinating code migrations, secure agent configuration, HTTPS setup, ODBC connection management, and user access governance.
- Implemented CDIPC on Informatica PowerCenter, delivering measurable revenue benefit and securing continued vendor support continuity for the bank.
- Upgraded IDQ and IMM from v10.5.3 to v10.5.8 with zero production disruption, applying hot fixes and validating configurations across environments.
- Integrated Splunk with Informatica PowerCenter for centralized logging and proactive monitoring, reducing Mean Time to Detect (MTTD) incidents across the enterprise data platform.
- Led vulnerability management program by integrating ServiceNow VR with Qualys, enabling timely detection, risk tracking, and remediation of security exposures across 120+ applications.
- Deployed and managed HashiCorp Vault for secrets management on IICS, and strengthened endpoint security by rolling out CrowdStrike across all Informatica environments.
- Utilized Dynatrace for end-to-end observability and performance tuning, proactively identifying and resolving server-side bottlenecks before business impact.
- Authored and automated AWS-based data migration pipelines in IICS and Azure based data migration in PowerCenter— reducing manual data migration effort significantly.
- Managed enterprise Change Advisory Board (CAB) submissions, leading platform change requests, release management, code reviews, and deployment sign-offs with cross-functional Dev and Architecture teams.
- Identified and documented technical debt across Informatica and Erwin applications; produced RCAs, severity assessments, and mitigation plans that reduced recurring production incidents.
- Handled Federal and Internal audits end-to-end — managing audit findings, mitigation plans, deferral submissions, and false-positive vulnerability claims in partnership with Senior Management.
- Negotiated OLA/SLA parameters with business and project managers based on application capacity, improving SLA adherence and reducing breach incidents.

- Performed full Informatica Administration lifecycle: installation, upgrades, hot fix application, node monitoring, repository and integration services management, secure agent setup, and DB connection configuration across PowerCenter, IICS, IDQ, and IMM.

Healthcare Data Quality Analyst (RCM) Jul 2013 – Jan 2019

NextGen Healthcare | Envision Healthcare | US Healthcare — Revenue Cycle Management

Delivered end-to-end RCM data services including denial management, AR recovery, and revenue leakage identification — helping practices increase collections by 20–30% and significantly reduce AR >90 days.

- Integrated claims data across Provider and Payer systems via EDI, interfacing with Epic, AllScripts, NextGen, MMIS, and MDIV — enabling seamless end-to-end data flow for 6+ years across multiple healthcare clients.
- Reduced data quality defects and maintained clean AR data by applying Six Sigma (SIPOC) methodologies, resulting in measurable improvements in claim accuracy and SLA adherence.
- Designed source-to-target mapping documents for Revenue Cycle Management data pipelines from mainframe flat files to Oracle databases, supporting 20–30% collection improvement for client practices.
- Audited claims data against client SLAs and CMS/HHS compliance standards (HIPAA), ensuring 100% submission accuracy to regulatory bodies with zero compliance violations.
- Led and conducted training sessions for a team of claim adjudicators and QA analysts, improving team throughput and instituting structured process improvement workflows.
- Partnered with Data Architects and Modelers to build mapping documents and dashboard reporting aligned to user requirements, accelerating reimbursement turnaround times.

CORE COMPETENCIES

Platform & Production Support • Informatica Administration (PowerCenter / IICS / IDQ / IMM) • ETL Pipeline Management • Incident & Release Management • Disaster Recovery • Vulnerability Management • Cloud Automation (AWS) • Data Quality & Governance • SDLC & CAB Processes • SLA/OLA Negotiation • Federal & Internal Audit Handling • Team Leadership (10-member team) • Six Sigma Methodologies • US Healthcare RCM / HIPAA Compliance

TECHNICAL SKILLS

ETL / Integration: Informatica PowerCenter 10.5.x, CDIPC, IICS, IDQ, IMM, CA ESP, Erwin DM, QuerySurge
Databases: Netezza (NZ), DB2, Oracle, SQL Server, Snowflake, Mainframe Flat Files
Cloud & Automation: AWS, Azure Devops; Power Automate
Security Tools: CrowdStrike, Splunk SIEM, CyberArk, Qualys, HashiCorp Vault, Dynatrace
Reporting & BI: Tableau, Power Automate Dashboards
Languages & Scripting: SQL, Python, UNIX Shell Scripting
Work Management: ServiceNow, Rally, Git, SharePoint
Healthcare Systems: Epic EHR, MMIS, MDIV, AllScripts, NextGen Healthcare, PracticeMD

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC)
- Six Sigma Yellow Belt — VMEdu Inc. (2018)
- Data Science (SAS) — UNext for Enterprise (2019)
- Data Analysis Using Python — IBM (2020)
- Python 101 — Cognitive Class, IBM (2020)

EDUCATION

Master of Science, Healthcare Informatics — Sacred Heart University, Fairfield, CT | 2019
